Headline: How We Serve Those Who Served Our Country

Home of the Brave Hearts Veterans Homes was created to help veterans in need in Ohio and beyond. We strive to deliver the highest quality of attainable interim housing for veterans and their families. We also look to help veterans in need by teaching them a multitude of skills and empowering them to self-sufficiency. While doing so, we treat everyone with integrity, fairness, and honesty.

Headline: The Heart Behind the Mission of Serving Homeless Veterans

Shakylia Cameron is the founder of Home of the Brave Hearts Veterans Homes. Cameron has been working with the veteran community for over six years. Her experience has made her passionate about empowering veterans so they can live the life they deserve. It has also increased her awareness of the size of the homeless veteran population. This realization led to her wanting to make a difference, and she began brainstorming ways to help veterans in need. It was at this time that she decided to get involved in low-income veteran housing.

Headline: Working Together to Help Homeless Veterans Succeed

Home of the Brave Hearts Veterans Homes looks to provide support by locating affordable alternative housing and transitional housing for homeless veterans. It is our belief that this will ease their transition back into society. In order to achieve our goal, our organization works with others to provide low-income veterans housing options and other resources to veterans. This includes working with the VA Medical Center and all veteran service providers, case managers, and veteran outreach specialists. It is this cooperation that ensures our servicemen and women are provided with a quality, safe place to call home.

Headline: Going Beyond Providing Homeless Veterans with Housing

At Home of the Brave Hearts Veterans Homes, we believe everyone can play a part in helping homeless veterans succeed. While we focus on providing alternative housing and low-income veteran housing options, we acknowledge there are other issues they face. For example, we provide information from the Veterans Medical Centers for those who face mental health issues.

We look to have a strong presence locally by regularly holding veteran outreach programs to help the community.
